Wedding Invitation Ink Colours

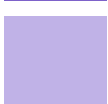

Willow Wood inks are mixed in-house using our own formulas & specifications to achieve clean and exciting colours. The inks are weighed to exact amounts using highly accurate electronic scales, then mixed until thoroughly blended to give the final colours.

Working with colour is one of the more difficult aspects of any graphic design process, shades are not only infinite but also changeable depending on light and background. You may pick a colour which feels perfect but laid alongside another the shade can change giving an entirely different effect. A deep blue placed next to a red will often take on a purple appearance, that's just a simple example.

The swatch will show you our full range of colours and once you've found the colour(s) you like simply make a note of the unique colour identifier or 'C Number' which you can use at the [online store](#) when you order.

You should also be aware that the display on your monitor screen may not be accurate and may give a different effect to the actual colours we are offering. If you are uncertain about the suitability of a colour then you should email us for a sample. If you would like a colour that is not shown here we *may* be able to help you so feel free to ask, a colour matching service is available!

Ink Colour Swatch

	Melba C 1		Periwinkle C 13		Aquamarine C 25		Sienna C 37
	Mandarin C 2		Heather C 14		Teal C 26		Bark C 38
