## Letterpress Wedding Invitation Typestyles

There's a vast number of **typestyles** (or fonts) now available through the World Wide Web and we've put together a collection we think you'll like.

You can choose to have your letterpress wedding invitation printed all in the same **typestyle** OR the text in one style and the bride and groom's names in another. To give a hand written feel we recommend one of the 'script' fonts for the names contrasted by a 'print' font for the main text. *There is no extra charge for using two typestyles.*

Our List of fonts appears below and with each font name you will find a unique 'T Number' as it's identifier, see the '3 step guide' below.

And remember, have fun!

### Step One

Browse through all the fonts as long as you like until you've made your choice then make a note of the 'T Number(s)'.

### Step Two

Once you have decided on the final typestyles for your wedding invitation you can place your order.

### Step Three

Make sure you have chosen your ink colours and wording option before you place your order.
